Summary

Junior Full Stack Developer building SaaS products, web applications, and business websites with Next.js, React, TypeScript, Node.js, and PostgreSQL. Freelance developer since 2022, working on dashboards, APIs, authentication, payments, internal tools, SEO, and programmatic SEO.

Experience

Freelance Developer

Feb 2022 – Present

- Remote
- Built full-stack applications for SaaS, marketing, and service-based clients using Next.js, React, TypeScript, Node.js, PostgreSQL, and modern backend tooling.
 - Delivered landing pages, dashboards, APIs, auth flows, payment integrations, internal tools, SEO-focused pages, and programmatic SEO systems.
 - Worked directly with clients from requirements to production deployment, integrations, and performance improvements.

Projects

Devhub

2026 – Present

Developer resource platform | GitHub | Live

- Built SEO-friendly frontend, backend API, auth, CMS content management, and PostgreSQL layer.
- Added Redis, RabbitMQ, Puppeteer, workers, and automation for resource processing.

Licht

2026

Desktop developer tool | GitHub | Live

- Built local Bun runtime with CLI commands, health checks, and request execution endpoints.
- Added SQLite env storage, proxying, execution history, metadata, errors, and Electrobun builds.

Northgrain Data

May 2026

Landing page and blog | Live

- Built a responsive landing page and MDX-powered blog for a fractional data engineering service.
- Focused on B2B positioning, premium design, SEO, reusable sections, and lead generation.
